

IFM Network Performance Metrics

June 11th, 2003

IFM Network Performance

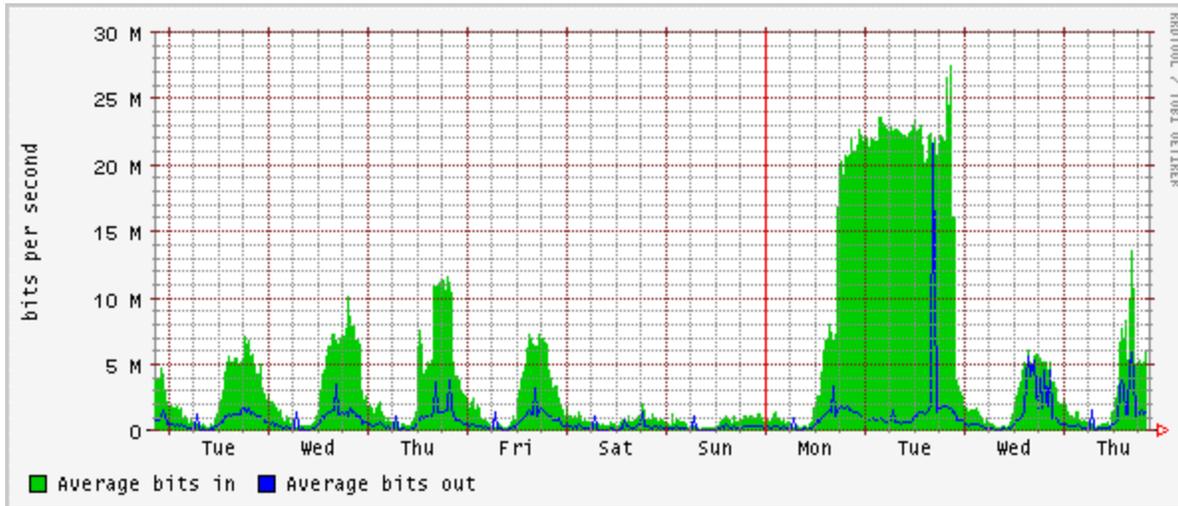

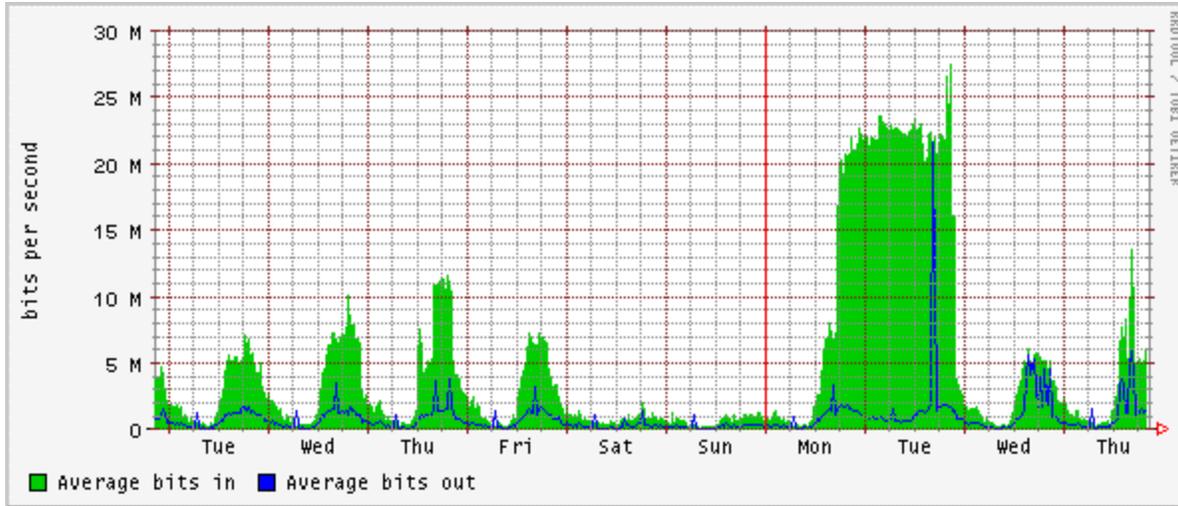

■ Significant events

- We investigated the rise in traffic leaving the IFM Data Center that started around 12:00 pm on Monday. This traffic was due to some ad hoc monitoring that is now being reworked.
- No other significant events have occurred.

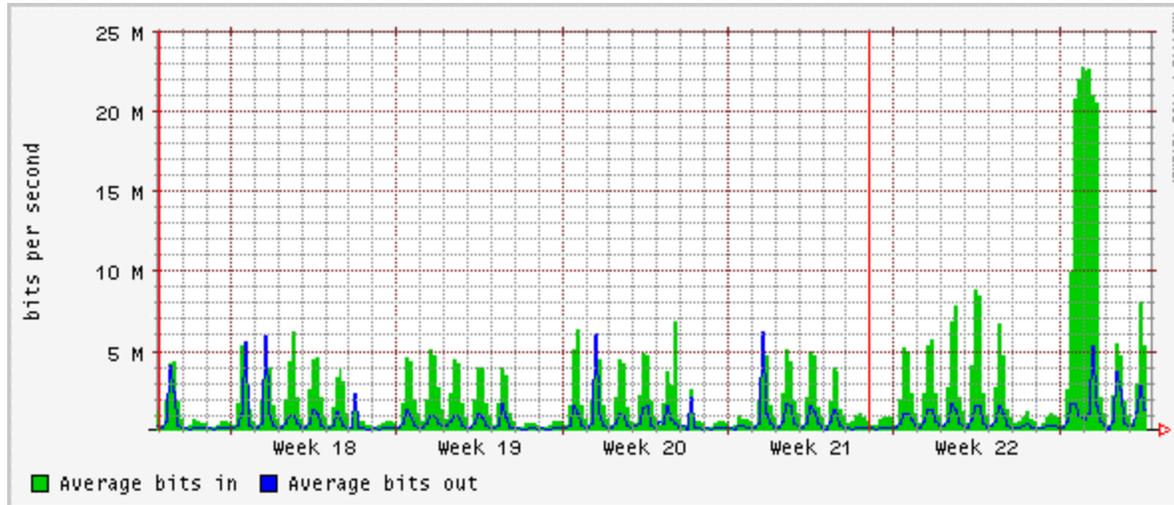

IFM Network Stats (Hourly and Daily)

Notes: Average bits in (Green) refers to bits out of IFM Network.
Average bits out (blue) refers to traffic coming into the IFM network.
(Stats are taken from WAN Router)

IFM Network Stats (Weekly and Monthly)

Notes: Average bits in (Green) refers to bits out of IFM Network. Average bits out (blue) refers to traffic coming into the IFM network. (Stats are taken from WAN Router)
